BITU 2913

UNIVERSITI TEKNIKAL MALAYSIA MELAKA
FACULTY OF INFORMATION AND COMMUNICATION TECHNOLOGY

WORKSHOP 1
PROPOSAL FORM

[Incomplete form will be rejected]

A	TITLE OF PROPOSED PROJECT: <i>Tajuk projek yang dicadangkan :</i> Project Domain: <i>Domain Projek:</i> ☒ BUSINESS & SERVICES ☐ HEALTHCARE ☐ TRANSPORTATION ☐ COMMUNITY SERVICESS ☐ AUTOMOTIVE ☐ AGRICULTURE ☐ OTHERS : _____
B	DETAILS OF STUDENT / MAKLUMAT PELAJAR
B(i)	Name of Student: Identity card no.: <i>Nama Pelajar:No. Kad Pengenalan :</i> Student matric no.: No. Matrik Pelajar : Programming Technique (BITP 1113) Grade : <i>Gred Teknik Pengaturcaraan (BITP 1113) :</i> ☐ A ☐ A- ☐ B+ ☐ B ☐ B- ☐ C+ ☐ C ☐ C- ☐ D
B(ii)	Correspondence Address : No 507, Blok 29, Jalan Bayam Merah 24/2, Seksyen 24, 40300, Shah Alam, Selangor <i>Alamat Surat Menyurat : No 507, Blok 29, Jalan Bayam Merah 24/2, Seksyen 24, 40300, Shah Alam, Selangor</i>
B(iii)	Course: <i>Kursus:</i> ☐ BITC ☐ BITZ ☐ BITE ☐ BITI ☐ BITM ☐ BITS ☒ BITD
B(iv)	Home Telephone No.: 03 - 55416075 <i>No. Telefon Rumah: 03 - 55416075</i> Handphone No.: 011 - 16194436 <i>No. Telefon Bimbit: 011 - 16194436</i>

B(v)	E-mail Address: sufianabaharom@gmail.com / sufianaadlin4@gmail.com Alamat e-mel: sufianabaharom@gmail.com / sufianaadlin4@gmail.com
C	PROJECT INFORMATION / MAKLUMAT PROJEK
C(i)	Duration of this project: <i>Tempoh masa projek ini:</i> Duration: <u>15 WEEKS</u> <i>Tempoh :</i> From : <u>17 / 03 / 2025</u> <i>Dari</i> : To : <u>27 / 06 / 2025</u> <i>Hingga</i> :
C(v)	Executive Summary of Project Proposal (maximum 300 words) (Please include the background of project, problem statements, objectives, scope and project significance from the project) <i>Ringkasan Cadangan Eksekutif Projek (maksima 300 patah perkataan)</i> <i>(Meliputi latar belakang projek, pernyataan masalah, objektif dan kepentingan projek)</i> A system called the Lestari Maintenance System (LMS) was created to enhance maintenance management and reporting in dorms. By implementing a centralized platform for reporting and monitoring maintenance concerns, it tackles the inefficiencies of manual operations. Using their matriculation numbers, students safely log on to make requests, which management then classifies and ranks. The technology allows students to monitor the status of their requests. Reports can be generated and stored data accessed by management. A maintenance request system for reporting and classifying issues, a request tracking module for tracking progress, and user management with secure login and account administration are some of the key features. LMS seeks to increase student happiness, expedite maintenance procedures, and speed up response times. Through the use of technology, LMS gives students a more comfortable living environment.

C(vi)	Detailed proposal of project: <i>Cadangan maklumat projek secara terperinci:</i> (a) Project background including Introduction and Problem Statements <i>Keterangan latar belakang projek termasuk pengenalan dan penyataan masalah.</i> 1. <i>Introduction</i> Student accommodations play a crucial role in providing a comfortable and safe living environment for students. However, maintaining these facilities efficiently is a significant challenge. Currently, many student accommodations rely on manual processes or basic tools like Google Forms for reporting and managing maintenance issues. This approach often leads to inefficiencies, delays, and dissatisfaction among students. The Lestari Maintenance System (LMS) is proposed as a software solution to address these challenges by providing a centralized platform for reporting, tracking, and managing maintenance issues in student accommodations. LMS aims to enhance the efficiency, transparency, and accountability of maintenance operations, ultimately improving the living experience for students. 2. <i>Problem Statements</i> a. Weak and Ineffective Reporting Mechanisms. b. Poor Accountability and Transparency. c. Poor Data Management. (b) Objective (s) of the Project <i>Objektif Projek</i> Example /Contoh: <i>This project embarks on the following objectives:</i> a. To Develop a Centralized Maintenance Reporting System : To Implement a user-friendly platform for students to report maintenance issues and track the status of their requests. b. To Enhance Transparency and Accountability : To Provide real-time updates on maintenance request statuses, ensuring students are informed throughout the resolution process and fostering trust in the maintenance management process. c. To Improve Data Management and Analysis : To Provide a strong data management system that gathers, arranges, and evaluates maintenance data so that managers can make well-informed decisions and allocate resources efficiently.
	Scope

Skop

1. Module to be developed

- i. Secure Login: Provides secure login functionality for students and management using matriculation numbers or designated credentials.
- ii. User Authentication: Ensures verified access for authorized users.
- iii. Account Management: Allows administrators to manage user accounts, including creating, updating, and deleting accounts.
- iv. Issue Reporting: Enables students to submit maintenance requests through a system.
- v. Request Categorization: Organizes reported issues into predefined categories for efficient handling.
- vi. Request Prioritization: Allows management to prioritize requests based on urgency or importance.
- vii. Track Maintenance Progress: Students can monitor the status of their maintenance requests in real-time.
- viii. Data Storage: Stores all maintenance-related data securely for future reference.

2. Target User

1. Management (Administrators)

- a) Secure Login: Access using designated credentials.
- b) Manage Requests: Manage Requests submitted by students (view, categorize, and prioritize).
- c) View Reports: Access report from student.
- d) Manage Accounts: Manage user accounts.

2. StudentsSecure:

- i. Login: Access using matriculation numbers.
- ii. Report Issues: Submit maintenance requests.
- iii. Track Requests: View request status.

(d) Problem Decomposition Description

Deskripsi Penguraian Masalah

a. Weak and Ineffective Reporting Mechanisms:

- i. Manual Reporting : The present dependence on manual procedures or basic technologies such as Google Forms results in the reporting of maintenance concerns being chaotic and inefficient.
- ii. Lack of Standardization : Different methods of reporting (e.g., paper forms, emails) result in inconsistent data collection and management.
- iii. Delays in Reporting: Manual processes often lead to delays in submitting and processing maintenance requests.

b. Poor Accountability and Transparency:

- i. Limited Visibility: Students lack real-time updates on the status of their maintenance requests, leading to frustration and mistrust.
- ii. Limited Visibility: Students lack real-time updates on the status of their maintenance requests, leading to frustration and mistrust.
- iii. Limited Visibility: Students lack real-time updates on the status of their maintenance requests, leading to frustration and mistrust.
- iv. Inadequate Feedback Mechanism: Students have limited opportunities to provide feedback on maintenance services, hindering continuous improvement.

c. Poor Data Management:

- i. Data Disorganization: Maintenance data is scattered across different platforms or stored manually, making it difficult to analyze and use for strategic planning.
- ii. Data Disorganization: Maintenance data is scattered across different

platforms or stored manually, making it difficult to analyze and use for strategic planning.

- iii. Lack of Insights: Without a centralized data management system, administrators cannot easily identify maintenance trends or optimize resource allocation.

(e) Structured Chart

Carta Berstruktur

DECOMPOSITION DIAGRAM =

1. Management (Administrators):

- Secure Login using designated credentials.
- Manage Requests submitted by students (view, categorize, and prioritize).
- Account Management functionality to create, update, and delete user accounts.
- Access stored data for maintenance tracking and analysis.

2. Students:

- Secure Login using matriculation numbers.
- Submit maintenance requests via the Issue Reporting module.
- Track request statuses in real-time through the Request Tracking module.

(f) Project Significance

Kepentingan projek

1. To Enhanced Maintenance Efficiency
2. To Improved Transparency and Accountability
3. Data-Driven Decision Making
4. To Ensure it Simplified Communication
5. To Increased Student Satisfaction

(g) Gantt Chart of Project Activities
